A TIAA Financial Essentials webinar

Hacking the Human—Cybersecurity and you

Are you concerned about identity theft and your family's security online?

TIAA’s Senior Lead Information Security Manager will discuss how behavioral psychology can be used by hackers for identity theft, account compromise, and impersonation. Learn how you can protect yourself and your family from cybercriminal social engineering.

Register today for this live webinar on Thursday, September 27, from 12 p.m. to 1 p.m. (ET).

Featured Speaker: Heather Bryant
Senior Lead Information Security Manager

In her role at TIAA, Heather translates technical concepts into actionable steps to protect employees and the company against cybercriminals. She manages the TIAA Cybersecurity Awareness program, including training for the TIAA workforce and published materials for customers. Heather has over 15 years of experience in the technology and financial services industries, and has developed a best in class phishing awareness program. Heather is also a dedicated wife, mother, and an advocate for parents protecting their kids online.
